EDUCATION

North Carolina State University Raleigh NC	08/2024 - 05/2026
Master of Science in Computer Science (Thesis Track) Tau Beta Pi Honor Society	GPA – 4.0 / 4.0
Walchand College of Engineering Sangli MH India	07/2017 - 05/2021
Bachelor of Technology in Information Technology	CGPA – 9.19 / 10
Courses – Automated Learning and Data Analysis, Database Management Systems, Neural Networks, Deep Learning beyond Accuracy, Data Visualization, Artificial Intelligence, Software Engineering, Data Mining	

SKILLS

Languages: Python, R, Javascript, SQL, C++, Java, Shell Scripting, Perl, Statistical Analysis, BERT, LLM Fine-tuning
GenAI and Agents: LLM APIs (OpenAI, Anthropic Claude, Gemini), LangChain, LangGraph, RAG, Vector DBs (Pinecone, FAISS), Prompt Engineering, Agent Orchestration, MCP, Claude Code, Cursor, Fine-tuning (LoRA)
ML / Data: PyTorch, TensorFlow, Hugging Face, Scikit-learn, LightGBM, XGBoost, MLFlow, BERT, NumPy, Pandas
Databases / Cloud: PostgreSQL, MongoDB, Snowflake, AWS (Bedrock, SageMaker), Redis, Kafka, Azure (OpenAI, ML)
Systems/Tools: Abacus AI, Datarobot, Linux, Git, Jenkins, Docker, Kubernetes, Apache Spark, CI/CD, Excel, Power BI
Web Technologies: React, Angular, TypeScript, Node.js, Django, Spring Boot, HTML5, CSS3, REST APIs, Unit Testing

WORK EXPERIENCE

Master's Thesis and Research Assistant – North Carolina State University Raleigh, NC	08/2025 – 04/2026
Designed novel data structures for ranked document retrieval for two pattern queries with TF-IDF scoring, achieving $O(n^{2/3} \cdot k^{1/3})$ query time and linear space - submitted to European Symposium on Algorithms 2026	
AI / ML Intern – NetApp Raleigh, NC	05/2025 - 08/2025
- Built production ML pipeline on 3M+ records for renewals classification & forecasting using Snowflake & SQL Server. - Deployed ensemble models (LightGBM with NetClassifier, XGBoost with early stopping) with hyperparameter tuning, improving F1 score by 8% and performed EDA, feature engineering on 3M records for time series renewal patterns. - Finalist in Innovation Challenge for designing a Agentic AI strategy for customer success using predictive analytics	
Software Engineer – Veritas Technologies Pune, India	04/2023 - 07/2024
- Led "Appliance Cloud Toolkit" feature in Python/C++/Java for NBA OS upgrades with predictive alerts and data-driven recommendations in System Health Insights platform; achieved 70% enterprise customer adoption. - Engineered performance optimization via shadow partitioning, reducing upgrade time by 40% (180 to 110 mins). - Designed a disaster recovery solution for 20+ high-availability clusters with 99.9% configuration retention	
Associate Software Engineer – Veritas Technologies Pune, India	07/2021 - 03/2023
- Collaborated cross-functionally on 2 releases per quarter to deliver 10% features, code reviews, and 70+ security fixes - Resolved P1 issues, feature bugs, core dumps using sosreport, GDB, and built unit test automation with 95% coverage - Built a distributed RPM packaging system with client-server communication and automated install flow using Make/Java/Shell scripting; eliminating manual processes while handling 9GB packages for 25+ releases	

PROJECTS

- UNewz – Deepfake & Clickbait Detection | "Best Use of .Tech Domain" – HackNCState-26 (MLH)**
Browser extension in Javascript integrating multimodal LLMs (Twelve Labs Pegasus for video, Gemini Pro for text/claim analysis) with Flask orchestration backend; surfaces inline credibility scores on YouTube in real-time.
- AI Web Browser Extension | SightBuddy – “Best Use of GenAI” award - HackNCState-25**
AI-powered web assistant leveraging LangChain agent orchestration, OpenAI APIs for summarization, and voice-to-text – empowering visually impaired users via accessible, responsible GenAI design.
- Technical Q&A with RAG, NLP:** Built production-style RAG pipeline with semantic chunking, vector embeddings (Pinecone), and hybrid retrieval; achieved 87% answer accuracy via prompt engineering and reranking. Exposed as function-callable tool; extended with Claude Code and MCP server integration for agentic document interaction.
- Pruning Deep Neural Networks:** Developed a new method for deploying lightweight models using sparse format.

CERTIFICATIONS, ACHIEVEMENTS, LEADERSHIP

- NC State[2024-26]:** Member, Badminton & Pickleball Clubs; Event Lead, Indian Graduate Student Association
- Veritas [2022-24]:** 2 Star of the Quarter Awards, 5 WoW Awards, Featured in company newsletter for innovation.
- Course Certifications:** Prompt Engineering, LangChain for LLM Apps, Deep Learning, AWS Cloud Fundamentals
